

MARMO MECCANICA

LCR - For pencilround and aris polishing work

The LCR machine is a special polishing unit for flat and aris work up to 60mm thick, and pencil round work to 40mm thick specifically. The LCR is belt driven, this type of machine means that all the pieces can continuously fed onto the belt and move past a series of polishing heads to perform these functions.

In addition to polishing, the LCH is also equipped with heads for chamfering the top and bottom of the edge.

DIMENSIONS OF INSTALLED MACHINE
